### **About GMV Minerals Inc.**

GMV Minerals Inc. is a publicly traded exploration company focused on developing precious metal assets in Arizona. GMV, through its 100% owned subsidiary, has a 100% interest in a Mining Property Lease commonly referred to as the Mexican Hat Property, located in Cochise County, Arizona, USA. The project was initially explored by Placer Dome (USA) in the late 1980s to early 1990s. GMV is focused on developing the asset and realizing the full mineral potential of the property through near term gold production. The Company's NI 43-101 mineral resource estimate (Inferred) is 36,733,000 tonnes grading 0.58 g/t gold at a 0.2 g/t cut-off, containing 688,000 ounces of gold, with an effective date of July 17, 2024. GMV has completed a Preliminary Economic Assessment and recently updated the cash flow analysis to reflect the change in gold price and inflation. Additional information on the Mexican Hat Project is available in the technical report titled "Updated Preliminary Economic Assessment, Mexican Hat Project" with an effective date of August 8, 2025 ("PEA"), which is available under Grande Portage's SEDAR+ profile at [www.sedarplus.ca](http://www.sedarplus.ca).

### **Technical Information and Cautionary Note Regarding Inferred Mineral Resources**

The mine plan evaluated in the PEA is preliminary in nature and includes Inferred Mineral Resources, as defined by NI 43-101 that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be converted to Mineral Reserves. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. Additional drilling and technical studies will need to be completed in order to fully assess its viability. There is no certainty that a production decision will be made to develop the Mexican Hat Project or that the economic results described in the PEA will be realized. Mine design and mining schedules, metallurgical flow sheets and process plant designs will require additional detailed work and economic analysis and internal studies to ensure satisfactory operational conditions and decisions regarding future targeted production. Key assumptions, qualifications and estimates to the results of the PEA are contained in the PEA.

### **Cautionary Note to U.S. Investors**

The United States Securities and Exchange Commission permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We use certain terms in this news release, such as "Measured," "Indicated," "Inferred," and "Resources," that the SEC guidelines strictly prohibit U.S. registered companies from including in their filings with the SEC.
